EBA

**Launches public consultation to enhance
proportionality in liquidity reporting**

28 April 2021

The European Banking Authority ("EBA") launched a public consultation on its draft Implementing Technical Standards ("ITS") on supervisory reporting with respect to Additional Liquidity Monitoring Metrics ("ALMM"). Following the mandate laid down in the revised Capital Requirements Regulation ("CRR2"), the EBA is proposing to introduce some proportionality considerations in ALMM reporting for small and non-complex institutions. Additional amendments to the templates are introduced with the aim of streamlining reporting requirements, filling in data gaps and further clarifying the reporting instructions. EBA

Consults on draft Guidelines on the delineation and reporting of available

financial means of Deposit Guarantee Schemes

28 April 2021

The EBA launched a public consultation on its draft Guidelines on the delineation and reporting of available financial means ("AFM") of Deposit Guarantee Schemes ("DGSs"). The purpose of the Guidelines is to ensure that only funds that credit institutions contributed, or that stem indirectly from such contributions such as recoveries or investment income, will count towards reaching the target level of the DGS fund. Conversely, funds that stem directly or indirectly from borrowed resources should not count towards the target level. This clarification aims at preventing the situation where a DGS could meet the target level by taking out a loan. For more information please press [here](#).

India health crisis set to crimp nascent rebound in gold demand

29 April 2021

"A fledgling recovery in India's gold demand in the first three months of the year may be snuffed out by an explosive increase in coronavirus infections that keeps people at home, damping sales during the key wedding season. Purchases in the world's second-biggest consumer jumped 37% in the January to March period to 140 tons after slumping to the lowest in more than two decades last year, according to the World Gold Council. A combination of softening gold prices, a sharp pick-up in economic activity and the return of social activities such as weddings supported higher consumption, it said." U.K. vaccine rollout pushes sterling outlook higher

27 April 2021

"More than half of the U.K. population has received at least one dose of the Covid-19 vaccine, and the government has outlined a road map that may lift all restrictions by late June. Brightening prospects for the economy are helping drive the pound to levels last seen on a sustained basis before the Brexit vote. Traders are pricing in an increasing likelihood of the pound finishing 2021 at more than \$1.40, a level not sustained since before the June 2016 Brexit vote. But the prospects for the pound could change suddenly." For more information please press [here](#).

Tesla tokens from crypto exchange

Binance draw BaFin scrutiny

28 April 2021

"A push by Binance, the world's biggest cryptocurrency exchange, to offer tokens tied to the performance of popular U.S. stocks is drawing the attention of Germany's financial regulator. Binance may

have violated securities rules when it issued tokenized shares of Tesla Inc., MicroStrategy Inc. and Coinbase Global Inc., BaFin said Wednesday. The exchange doesn't appear to have filed a prospectus before offering the assets, according to a statement on the watchdog's website." For more information please press [here](#).
