ESMA

Assesses the compliance with UCITS

liquidity rules and highlights areas for vigilance

24 March 2021

The European Securities and Markets Authority ("ESMA"), the EU's securities markets regulator, publishes the results of the 2020 Common Supervisory Action ("CSA") on UCITS liquidity risk management ("LRM"). The CSA showed that the overall level of compliance with the applicable rules is satisfactory in most cases, but there is scope for improvement in liquidity management for some UCITS analysed. The exercise also highlighted areas where ESMA will work to further promote convergence across National Competent Authorities ("NCAs"). For more information please press [here](#).

EBA

Takes steps to address 'de-risking' practices

22 March 2021

The European Banking Authority ("EBA") published this month three regulatory instruments to address de-risking practices based on evidence gathered in its call for input. The instruments clarify that compliance with anti-money and countering terrorist financing (AML/CTF) obligations in EU law does not require financial institutions

to refuse, or terminate, business relationships with entire categories of customers that they consider to present a higher ML/TF risk. In these documents the EBA also set out steps that financial institutions and competent authorities should take to manage risks associated with individual business relationships in an effective manner. **Philippine bonds still look pricey on all
these metrics**

26 March 2021

"Philippine bonds have taken a battering this year but they still look expensive on a number of metrics. Even after climbing for the past two months, the nation's yields offer a relatively narrow spread over the central bank's policy rate and also U.S. Treasuries, according to a Bloomberg analysis looking at historical averages. At the same time, inflation is comparatively high and the peso appears somewhat richly valued." For more information please press [here](#).

Biggest bitcoin fund's woes worsen as discount sinks to record

25 March 2021

"Bitcoin's worst selloff since December is dealing a particularly harsh blow to the biggest fund tracking the cryptocurrency. The \$29.4 billion Grayscale Bitcoin Trust (ticker GBTC) has dropped about 20% so far this week, nearly double the decline in the world's largest cryptocurrency. GBTC closed over 14% below the value of its underlying holdings on Wednesday as a result -- a record discount, according to data compiled by Bloomberg.
