EBA

Updates data used for the identification of global systemically important institutions ("G- SIIIs")

20 August 2020

The European Banking Authority ("EBA") published 12 indicators and updated the underlying data from the 37 largest institutions in the EU, whose leverage ratio exposure measure exceeds EUR 200 billion. This end-2019 data contributes to the internationally agreed basis on which a smaller subset of banks will be identified as global systemically important institutions ("G-SIIIs"), following the final assessments from the Basel Committee on Banking Supervision ("BCBS") and the Financial Stability Board ("FSB"). The EBA, acting as a central data hub in the disclosure process, will update this data on a yearly basis and will provide a user-friendly platform to aggregate it across the EU. For the first time this year,

the EBA is including the Legal Entity Identifier ("LEI") of each institution, which will facilitate peer review exercises and broader data analyses. For more information please press [here](#).

New derivatives position limits won't dampen trading or hedging

20 August 2020

"Derivative traders, exchanges and non-financial firms seeking to hedge risk likely won't be greatly affected by a CFTC proposal imposing trading limits on 25 commodities. For 23 of the contracts, limits would be set equal to or above those the exchanges have in place. We expect minimal change to the plan, which should be finalized in the next few months."
